

## DOCUMENT CHANGE REQUEST

DCR number 197

Changes required for: General

Originator: Anastasia Pesce

Date: 2005/08/30

Date sent: 2005/08/30

Organisation: ESA/ESTEC

Status: IMPLEMENTED

Title: REP001

Number: REP001

Issue: 1

Other documents affected:

Page:

All

Paragraph:

All

Original wording:

Proposed wording:

Retire specification into Rep002

Transfer minor content concerning certificate serialisation into 20100.

Justification:

The specification deals primarily with the respective tasks of ESA and the QSA with respect to MOQ and with the role of the ESA Qualification Board for ESA/SCC qualifications. For ESCC this is replaced by the ESCC Executive and the respective roles of Executive members from ESA and NSAs will be the subject of Executive internal working procedures. ESCC 20100 already addresses extension of qualification in so far as users (component manufacturers) need to be informed of the process. The only additional user information 23000 contains concerns the serialisation of qualification certificates. This element is proposed to be added to 20100 (See 20100 Issue 2 draft subject of DCR 186).

The ESA QB does not exist as part of the ESCC structures. Rather the Executive applies to ESA for qualification extension when the Executive has ascertained that MOQ is complete and correct.

With these considerations 23000 has no content relevant to ESCC to justify maintaining it as a self standing document. Accordingly it is recommended to retire it into Rep002 status.
