| Page: | | | | | | | |
| 12 | | | | | | | |
| Paragraph: | | | | | | | |
| 2.8 | | | | | | | |
| Original wording: | | | | | | | |
| The Minimum Limit of Insulation Resistance RI for the Accelerated Damp Heat test is "Note 1" | | | | | | | |
| Proposed wording: | | | | | | | |
| The Min. Limit of Insulation Resistance RI for the Accelerated Damp Heat test should be "Note 5" | | | | | | | |
| Justification: | | | | | | | |
| I can confirm, following a query received from Exxelia (Vincent Baccarrere), that the Note reference given above in "original wording" is wrong; the minimum Limit for this measurement is in fact "50% of the value given in Para. 2.6.1" per Note 5 to Para. 2.8. | | | | | | | |
