

# DOCUMENT CHANGE REQUEST

DCR number 1772 Changes required for: Qualification  
Date: 2026/01/28 Date sent: 2025/10/15  
Status: IMPLEMENTED

Originator: Lindsay Turot  
Organisation: Axon Cable

Title: High Data Rate Cable Assemblies

Number: 3409 Issue: 1

Other documents affected:

Page:

46

Paragraph:

12.4.2

Original wording:

Vibration in Chart F4B - Periodic Testing and Lot Validation Testing

Proposed wording:

Remove vibration testing from Chart F4B

Justification:

Vibrations testing is not considered at risk for this technology. Several profiles of vibrations have been applied to this range of product as part of ESCC qualification (with profiles from 3409 and 3401) and of specific program qualification. No non-conformances were met after or during vibrations testing. Axon' propose to remove this test from the periodic testing. (Also 3409 derives from 3408 which doesn't have vibrations in periodic testing for RF cable assemblies)
