Proposed wording:

New:

IRCA-RICA division, Italy: flexible single and double-layer heaters

RICA adopted the QML qualification approach for flexible single- and double-layer heaters. Standard components have been qualified in accordance with the QPL approach (ESCC 20100), with Certificate 184 issued in 1992 and Certificate 330 issued in 2015.

Editorial:

ST Microelectronics, France: ASIC platform C65Space

The ESCC specification 9304/010 for the NanoXplore NG-MEDIUM FPGA has been retained, in line with the approach used for other NanoXplore products

Justification:

publication QML 32
