

DOCUMENT CHANGE REQUEST

DCR number 295 Changes required for: General

Date: 2006/10/18

Date sent: 2006/10/18

Originator: Steve Thacker

Organisation: ESA/ESTEC

Status: IMPLEMENTED

Title: Microswitches Sensitive 1PDT, based on series T3

Number: 3701/003

Issue: 1

Other documents affected:

Page:

Page 16 Table 3 Note 1

Paragraph:

Page 16 Table 3 Note 1

Original wording:

Proposed wording:

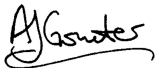

Amend the sample size for Table 3 - Electrical Measurements At High And Low Temperatures from 20 to 5. i.e.

Page 16 Table 3 Note 1 : amend to read 5 units (was 20) in both places

Justification:

The switch, T3, is hermetically sealed. All internal materials are metallic and cleaned by Ultra Sonics, so the contact can't be contaminated by pollution after closure. A reduction of the test sample size is proposed for cost reduction purpose yet still to maintain a sufficient test standard.

Note - this DCR replaces withdrawn DCR239 as discussed and agreed on the online ESCC DCR Review Page
