Paragraph:

Page 78: Class of Publication: 42, IC's Sil Mon Bi: Linear

Original wording:

Proposed wording:

Remove ESCC Detail Specification No. 9102/005 Issue 1 (3-Terminal Adjustable Positive Regulator, based on type LM117) from REP001 (to be transferred to REP002).

Justification:

The device covered by this ESCC Detail Specification is no longer supported for new procurement against ESCC 9000 as confirmed by Semelab (the only recognised manufacturer. Note - the original manufacturer, Motorola, ceased manufacturing parts for space procurement several years ago). As such the specification is considered as discontinued and should be retired to REP002.
