

## DOCUMENT CHANGE REQUEST

DCR number 1252

Changes required for: Qualification

Originator: Lindsay Turot

Date: 2019/07/05

Date sent: 2019/03/06

Organisation: Axon Cable

Status: IMPLEMENTED

Title: Connectors, Electrical, Rectangular, Microminiature, High Data Rate (Female Coaxial Contacts)

Number: 3401/089

Issue: 1

Other documents affected:

Page:

Last page

Paragraph:

Deviation for Axon' Cable

Original wording:

None

Proposed wording:

See word file enclosed

Justification:

The qualification philosophy of High Data Rate cable assemblies is to qualify a complete HDR solution from the equipment to the other, that is to say to qualify both the cable assembly and the two opposite equipment connectors. To be consistent with this philosophy, Axon's QTP considers qualification testing in accordance with ESCC 3409 to qualify PCB connectors (defined in ESCC 3401/089). See Axon's QTP enclosed.
