Note STM is an ESCC QPL listed manufacturer and this device is ESCC qualified; accordingly there is an ESCC approved PID for this device. This amendment is considered technically acceptable on this basis.

Justification:

(see also change details for each item above)

1. Part of the ongoing activity of conversion of cover-sheeted ESA/SCC specifications to the ESCC format.
2. To make the format and presentation consistent with the various other ESCC Detail Specifications already converted to ESCC format.
3. To make the content consistent with ESCC Generic Specification No. 5000 Issue 3.
4. To incorporate specific deviations requested by manufacturer STM within Appendix A which are considered technically acceptable (based on ESCC approved PID for this and other ESCC qualified components manufactured by STM).
5. Update manufacturersâ.. current product availability.
6. To make corrections to technical errors in the previous issue.
7. Standardisation of the TO-39 and CCP packages in all applicable ESCC detail specs.
