1 GENERAL

1.1 SCOPE

This specification details the ratings, physical and electrical characteristics, test and inspection data for a Diode, Microwave, Silicon, Multiplier Varactor, based on Types DH252, DH256, DH267, DH292 and DH294. It shall be read in conjunction with ESCC Generic Specification No. 5010, the requirements of which are supplemented herein.

1.2 TYPE VARIANTS

Variants of the basic diodes specified herein, which are also covered by this specification are given in Table 1(a).

1.3 MAXIMUM RATINGS

The maximum ratings, which shall not be exceeded at any time during use or storage, applicable to the diodes specified herein, are as scheduled in Table 1(b).

1.4 PARAMETER DERATING INFORMATION

The derating information applicable to the diodes specified herein is shown in Figure 1.

1.5 PHYSICAL DIMENSIONS

The physical dimensions of the diodes specified herein are shown in Figure 2.

1.6 FUNCTIONAL DIAGRAM

The functional diagram, showing lead identification, of the diodes specified herein, is shown in Figure 3.

1.7 HANDLING PRECAUTIONS

These devices are susceptible to damage by electrostatic discharge. Therefore, suitable precautions shall be employed for protection during all phases of manufacture, testing, packaging, shipment and any handling.

These components are Categorised as Class 2 with a Minimum Critical Path Failure Voltage of 1550V.

2 APPLICABLE DOCUMENTS

The following documents form part of this specification and shall be read in conjunction with it:

- (a) ESCC Generic Specification No. 5010 for Discrete Microwave Semiconductor Components.
- (b) MIL-STD-750, Test Methods for Semiconductor Devices.

3 TERMS, DEFINITIONS, ABBREVIATIONS, SYMBOLS AND UNITS

For the purpose of this specification, the terms, definitions, abbreviations, symbols and units specified in ESCC Basic Specification No. 21300 shall apply. In addition the following symbols are used:

- C_T = Total Capacitance
- τ_L = Minority Carrier Lifetime
- t_{SO} = Snap off Time

FIGURE 3 – FUNCTIONAL DIAGRAM**NOTES**

1. The cathode end shall be marked with a black dot. The marking will not be on the cathode connection but adjacent to it except for the case in Figure 2(g).

4 REQUIREMENTS**4.1 GENERAL**

The complete requirements for procurement of the diodes specified herein are stated in this specification and ESCC Generic Specification No. 5010 for discrete Microwave Semiconductor Components. Deviations from the Generic Specification, applicable to this specification only, are listed in Para. 4.2.

Deviations from the applicable Generic Specification and this Detail Specification, formally agreed with specific Manufacturers on the basis that the alternative requirements are equivalent to the ESCC requirements and do not affect the components' reliability, are listed in the appendices attached to this specification.

4.2 DEVIATIONS FROM GENERIC SPECIFICATION**4.2.1 Deviations from Production Control**

- (a) Para. 5.3, Wafer Lot Acceptance: Minority Carrier Lifetime (τ_L) and Snap Off Time (t_{SO}) shall be performed on wafer acceptance best parts. 27 die on wafer for τ_L and 20 packaged diodes for t_{SO} .

4.2.2 Deviations from Final Production Tests (Chart II(b))

None.

4.2.3 Deviations from Burn-in and Electrical Measurements (Chart III(a))

None.

4.2.4 Deviations from Qualification Tests (Chart IV)

- (a) Para. 9.13, Shock Test: Shall not be performed.
- (b) Para. 9.14, Vibration: Shall not be performed.
- (c) Para. 9.15, Constant Acceleration: Shall not be performed.
- (d) Para. 9.19, Terminal Strength: Shall not be performed for Variants 11, 16, 21, 26, 31, 36, 41, 46, 51 and 56.
- (e) Para. 9.23, Special Testing: Shall not be performed.

4.2.5 Deviations from Lot Acceptance Tests (Chart V)

- (a) Para. 9.13, Shock Test: Shall not be performed.
- (b) Para. 9.14, Vibration: Shall not be performed.
- (c) Para. 9.15, Constant Acceleration: Shall not be performed.
- (d) Para. 9.19, Terminal Strength: Shall not be performed for Variants 11, 16, 21, 26, 31, 36, 41, 46, 51 and 56.
- (e) Para. 9.23, Special Testing: Shall not be performed.

4.3 MECHANICAL AND ENVIRONMENTAL REQUIREMENTS

4.3.1 Dimension Check

The dimensions of the diodes specified herein shall be checked. They shall conform to those shown in Figure 2.

4.3.2 Weight

The maximum weight of the diodes specified herein shall be as follows:

- Variants 10 to 15, 20 to 25, 30 to 35, 40 to 45 and 50 to 55: 0.02g.
- Variants 16, 26, 36, 46 and 56: 0.15g.

4.3.3 Terminal Strength

The requirements for terminal strength testing are specified in Section 9 of ESCC Generic Specification No. 5010. The test conditions shall be as follows:

- (a) Condition: 'A' (Tension) Variants 10, 12 to 15, 20, 22 to 25, 30, 32 to 35, 40, 42 to 45, 50 and 52 to 55:
 - Force: 1.25N
 - Duration: 10 seconds.

4.3.4 Bond Strength

The requirements for bond strength are specified in Section 9 of ESCC Generic Specification No. 5010. The test conditions shall be as follows:

- (a) Condition: 'A' (tension).
- (b) Separating Force: 0.03N minimum.

4.3.5 Die Shear

The requirements for die shear are specified in Section 9 of ESCC Generic Specification No. 5010. The test conditions shall be as follows:-

- (a) Semiconductor material remaining: 50% minimum.

4.3.6 High Temperature Stabilisation Bake

The requirements for high temperature stabilisation bake are specified in Section 9 of ESCC Generic Specification No. 5010. The temperature to be applied shall be +175 (+0 -3)°C.

4.4 MATERIALS AND FINISHES

The materials and finishes shall be as specified herein. Where a definite material is not specified, a material which will enable the diodes specified herein to meet the performance requirements of this specification shall be used. Acceptance or approval of any constituent material shall not guarantee acceptance of the finished product.

4.4.1 Case

The case shall be hermetically sealed and have a ceramic body. The lid shall be welded or preform soldered.

4.4.2 Lead Materials and Finish

- (a) For Variants 10 to 15, 20 to 25, 30 to 35, 40 to 45 and 50 to 55, the body material shall be Type 'D' with Type '7' finish and the lid material shall be Type 'E' with Type '2' finish, in accordance with the requirements of ESCC Basic Specification No. 23500.
- (b) For Variants 16, 26, 36, 46 and 56, the body material shall be Type 'A' with Type '7' finish and the lid material shall be Type 'D' with Type '7' finish, in accordance with the requirements of ESCC Basic specification No. 23500.

4.5 MARKING

4.5.1 General

The marking of components delivered to this specification shall be in accordance with the requirements of ESCC Basic Specification No. 21700 and the following paragraphs. When the component is too small to accommodate all of the marking specified, as much as space permits shall be marked and the marking information, in full, shall accompany the component in its primary package.

The information to be marked and the order of precedence, shall be as follows:-

- (a) Cathode Identification.
- (b) The ESCC Component Number.
- (c) Traceability Information.

4.5.2 Cathode Identification

Cathode identification shall be as shown in Figures 2 and 3 of this specification.

4.5.3 The ESCC Component Number

Each component shall bear the ESCC Component Number which shall be constituted and marked as follows:

Example: 551201610BF

- Detail Specification Number: 5512016
- Type Variant (see Table 1(a)): 10
- Testing Level (B or C, as applicable): B
- Total Dose Irradiation Level (if applicable): F

The Total Dose Irradiation Level designation shall be added for those devices for which a sample has been successfully tested to the level in question. For these devices, a code letter shall be added in accordance with the requirements of ESCC Basic Specification No. 22900.

4.5.4 Traceability Information

Each component shall be marked in respect of traceability information as defined in ESCC Basic Specification No. 21700.

4.6 ELECTRICAL MEASUREMENTS

4.6.1 Electrical Measurements at Room Temperature

The parameters to be measured at room temperature are scheduled in Table 2. Unless otherwise specified, the measurements shall be performed at $T_{amb} = +22 \pm 3^{\circ}\text{C}$.

4.6.2 Electrical Measurements at High and Low Temperatures

The parameters to be measured at high and low temperatures are scheduled in Table 3. Unless otherwise specified, the measurements shall be performed at $T_{amb} = +150 (+0 -3)^{\circ}\text{C}$.

4.6.3 Circuits for Electrical Measurements

Circuits for use in performing electrical measurements listed in Table 2 of this specification are shown in Figure 4.

4.7 BURN-IN TESTS

Burn-in shall be Category 2 of Chart III(a) of ESCC Generic Specification No. 5010.

4.7.1 Parameter Drift Values

The parameter drift values applicable to burn-in are specified in Table 4 of this specification. Unless otherwise stated, the measurements shall be performed at $T_{amb} = +22 \pm 3^{\circ}\text{C}$. The parameter drift values (Δ) applicable to the scheduled parameters shall not be exceeded. In addition to these drift value requirements for a given parameter, the appropriate limit value specified in Table 2 shall not be exceeded.

4.7.2 Conditions for High Temperature Reverse Bias Burn-in

The requirements for the high temperature reverse bias burn-in are specified in Section 9 of ESCC Generic Specification No. 5010. The conditions for high temperature reverse bias burn-in shall be as specified in Table 5(a) of this specification.

4.7.3 Conditions for Power Burn-in

The requirements for power burn-in are specified in Section 9 of ESCC Generic Specification No. 5010. The conditions for power burn-in shall be as specified in Table 5(b) of this specification.

4.7.4 Electrical Circuits for High Temperature Reverse Bias and Power Burn-in

Circuits for use in performing the H.T.R.B and power burn-in tests are shown in Figures 5(a) and 5(b) of this specification.
