

Thursday 26th May 2005

RADECS Thematic Workshop on European SEE Accelerators Round Table 1, 2 & 3: Conclusions

Chairs : Reno Harboe Sørensen / ESA & Committee

Final thoughts by Reno (main action per RT).

- RT1: Better coordination and visibility of available beam time in Europe.
(Renaud/Reno – to give recommendations)
- RT2: LET Calculation/Ion Penetration & Calibration
(Wojtek/Guy – to form working group)
- RT3: Proton angular effects appear to be more of an academic than practical problem.
(Further recommendation Sophie)

Progress on these three items will be given at RADECS 2005 in September.
