

Summary: I.

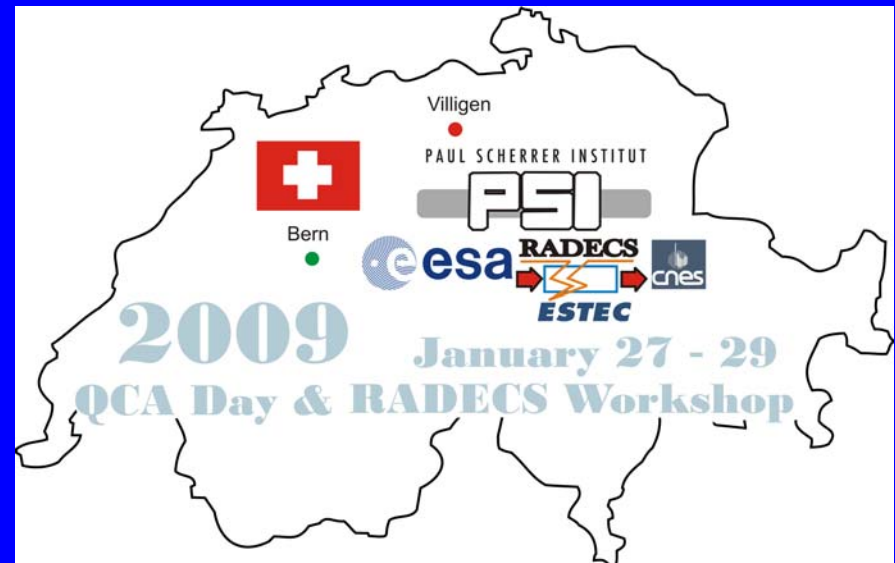

- # “Better Awareness of SET Issues”. - **Achieved**
- # Review our current level of Understanding. - **Achieved**
- # Update on current SET experiences obtained by agencies, industry and manufacturer. - **Achieved**
- # Open discussion during/after each presentation.

- **Fairly successful!**

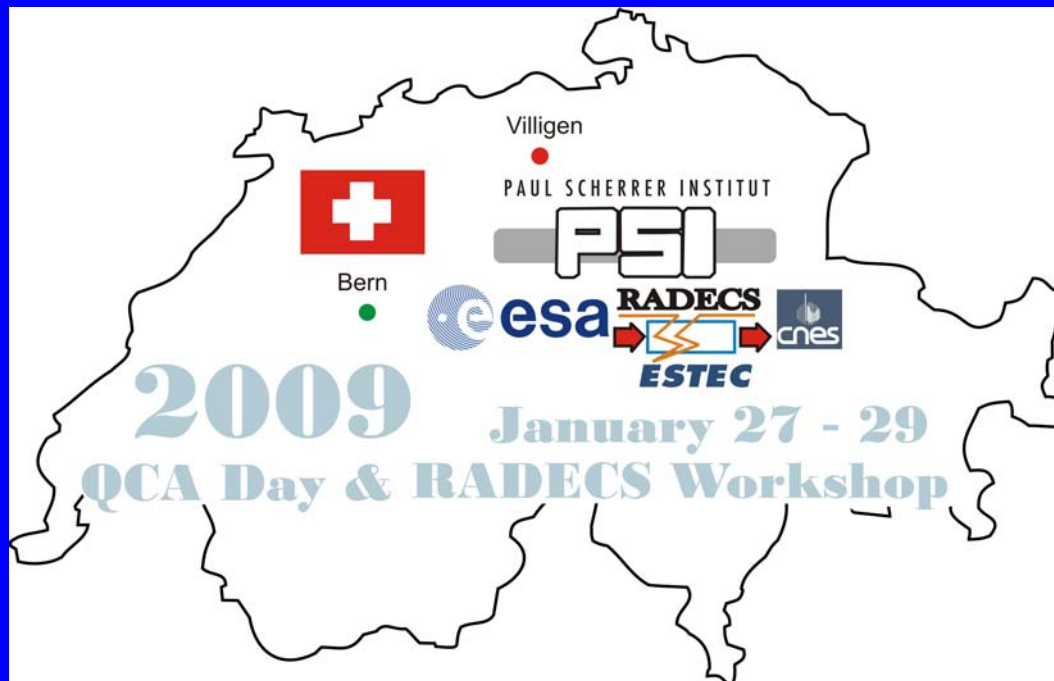

Summary: II.

- # Evidence of Destructive SETs in Spacecrafts ? – **Not Clear**
- # SET Proton Testing – **Still a Complex Issue**
- # SET Predictions – **Still a Complex Issue**
- # SET RHA Requirements
- Still Open!

3rd RADECS Thematic Workshop – 29th of January 2009.

As organiser, this is my 3rd and last RADECS Thematic Workshop event! – I will retire from ESA in August 2009!

Hope you find a new organiser in the near future as I like to see these events continued.

Reno Harboe Sørensen, ESA/ESTEC, D/TEC-QEC
