1. **INTRODUCTION**

This checklist is intended for use during the initial survey of a Manufacturer's ability to produce high quality articles, his management organisation, production facilities, test facilities and technical know-how. When completed, this checklist should enable the party interested in procurement of the subject components to assess the ability of the Manufacturer concerned to successfully execute a contract for the supply of high reliability space hardware.

2. **SURVEY CHECKLIST**

While the ESA/SCC specification is being prepared, ESA/SCC Basic Specification No. 2029000, "Checklist for Monolithic Microcircuit Manufacturer and Line Survey" shall be used to the extent applicable.
