NOTES

1. Maximum time to output comparator strobe 30μs.
2. Channel ON resistance matching may be calculated from the results obtained during R_{ON} testing. The results of measurements from all Channel I/O to Common O/I and reverse should be compared against each other and the maximum limits given below are guaranteed.

	R_{ON1}	R_{ON2}
$\Delta R_{ON}(\Omega)$	20	20

3. Guaranteed but not tested.
4. Measurements shall be performed on a 100% basis go-no-go, with read and record on a sample basis, LTPD7 (32 pieces) after Chart III (Burn-in) Tests.
