'A'	Qualified Components List	4
-----	---------------------------	---

### 1. <u>FOREWORD</u>

This document contains a list of components that have been qualified to the rules of the ESCC System and are intended for use in ESA and other spacecraft and associated equipment in accordance with the requirements of the ECSS Standard ECSS-Q-60A.

It is permitted to advertise the ESCC qualification status of a product provided such publicity or advertisement does not state or imply that the product is the only qualified or capability approved one of that particular type, range or family.

#### 2. PROCURORS' RESPONSIBILITY

When procuring ESCC qualified or capability approved components, the procuror is responsible for ensuring that the qualification or capability approval status is valid and that delivered components fulfil the specified requirements of the applicable ESCC specifications. The procuror is advised to utilise the ESCC non-conformance system in the event that a qualified or capability approved manufacturer delivers non-conforming components.

#### 3. <u>USE OF TABLES</u>

#### 3.1 <u>Publication</u>

The individual entries are published in sections within this document and are presented by manufacturer on the web, the starting point for which is:

#### https://escies.org/public/escc/qpl/

#### 3.2 Type Designation

The referenced type (style) designations are derived from industrial standards (i.e., JEDEC, PRO-ELECTRON, MIL, IEC, and CECC). The purpose is to identify the similarity of a listed qualified component, to a standard type designation.

#### 3.3 <u>Component Characteristics</u>

The electrical characteristics are listed for guidance only and, unless otherwise stated, are specified at +25° C. The precise characteristics of the qualified component are defined in the referenced ESCC specification.

## 3.4 Manufacturer

Plant locations are indicated in the individual listings; contact information is given in full on the appropriate web pages accessed from:

#### https://escies.org/public/escc/qpl/

## 4. <u>REVISION PROCEDURE</u>

Amendments to earlier issues of the QPL implemented herein are indicated by the date on the front page and by the content of the "Document Changes" pages. The latter provide the changes over a one year period. (The <u>same</u> issue date appears on the table at the start of each Section of the Appendix irrespective of whether changes have been made in a particular section. This indicates the information has been reviewed and is current.) The ESA/SCC System is superseded by the ESCC (European Space Components Coordination) System and in consequence this issue of the ESCC QPL is the first one.

## 5. TABLE OF QUALIFIED COMPONENTS

Components qualified to the ESCC System are grouped by component type designations. Individual components are listed within the relevant sections as indicated in Table 5.1.

Section	Component Types
01	Capacitors
02	Connectors
03	Crystals
04	Diodes
05	Filters
06	Fuses
07	Inductors
08	Microcircuits
09	Relays
10	Resistors
11	Thermistors
12	Transistors
13	Wire and Cables
14	Miscellaneous

R.F. ATTENU European Space Components Coordination		Certificate No.	Valid Until	14-01	
<b>QPL</b> BASED ON TY	PE R413	178 D	April 2007	004	

Types covered by similarity :			Remarks :			
Variants 01 to 06 are qualified						
	Specifications n certification date	Manufacturer	Nature of Approval	Supervising Authority		Date
Generic ESCC 3702		COMEPA BAGNOLET	Qualification	CNES	Ma	arch 2004
Detail ESCC 3702/001		France	Re-qualification	CNES	Au	gust 2005
Characteristics						
Range Of Components: Grade 1 and	Grade Y					
Maximum Ratings:						
Rated Current (I <sub>R</sub> ): 4 A (30 V <sub>dc</sub> resisti	ve)					
Operating Temperature Range (°C): -	50 to +150					
			Current Validit	y of Qualification		Page
SWITCHES, THERMOSTATIC, BIMETALLIC, SPST,		Certificate No.	Valid Until		14-03
