

2nd Radecs Thematic Workshop – 25th January 2007

Round Table 1 & 2 Conclusions:

Final thoughts by Reno

Many views, inputs and suggestions surfaced during these two round tables. No clear way forward could be identified but it was clear that something needs to be done. As a first step I suggested to form as small LET working group who should try to identify a way forward. Among RadWG volunteers the following group was formed;

**Reno Harboe Sørensen, Robert Ecoffet, Renaud Mangeret,
Stanley Mattsson, Michel Melotte**

This group already agreed on the first task of validating Robert's presentation covering – High LET ions in Space and possible effects on components!
