

Noordwijk, 31 May 2012

ESCC Executive Public Notice (EEPN-2012-1)

To all ESCC manufacturers (qualified and unqualified) and customers of products procured in compliance with ESCC Generic Specifications No. 5000 Discrete Semiconductors and No. 5010 Discrete Microwave.

MIL-STD-750F has been released 3rd of January 2012 with an implementation date of 3rd of July 2012.

This standard is applicable to ESCC Generic Specifications No. 5000 and No. 5010. Among others, MIL-STD-750F includes numerous changes to the Hermetic Seal test method now in version 1071.9.

The ESCC Executive and the ESCC Policy and Standards WG have concluded that the adoption of these TM changes by ESCC is not evident and requires further analysis. This analysis is sufficiently complex in nature and will also require manufacturer and customer feedback, such that it cannot be completed by the MIL-STD-750F implementation deadline.

Notice is hereby provided that ESCC products subject to MIL-STD-750 TM 1071 and successfully tested for hermeticity in accordance with MIL-STD-750E TM 1071.8 will be considered ESCC compliant until 30 June 2013. This validity date may be extended further subject to future ESCC decisions.

Where relevant ESCC manufacturers shall make reference to this Notice in their CoC and/or data package delivered to the customer.

Ralf de Marino
ESCC Executive Manager
