APPENDIX ‘A’		18

1 GENERAL

1.1 SCOPE

This specification details the ratings, physical and electrical characteristics, and test and inspection data for the component type variants specified below. It supplements the requirements of, and shall be read in conjunction with, the ESCC Generic Specification listed under Applicable Documents.

1.2 APPLICABLE DOCUMENTS

The following documents form part of this specification and shall be read in conjunction with it:

(a) ESCC Generic Specification No. 3010.

1.3 TERMS, DEFINITIONS, ABBREVIATIONS, SYMBOLS AND UNITS

For the purpose of this specification, the terms, definitions, abbreviations, symbols and units specified in ESCC Basic Specification No. 21300 shall apply.

1.4 THE ESCC COMPONENT NUMBER AND COMPONENT TYPE VARIANTS

1.4.1 The ESCC Component Number

The ESCC Component Number shall be constituted as follows:

Example: 301001404

- Detail Specification Reference: 3010014
- Component Type Variant Number: 04 (as required)

1.4.2 Component Type Variants

The Component Type Variants applicable to this specification are as follows:

Type Variant	Minimum and Maximum Specified Capacitance (pF)		Temperature Coefficient (10^{-6}/°C)	Weight Max (g)
	Cm	CM		
01	0.8	8	-75 ±75	6
02	0.8	8	400 ±100	6
03	0.8	8	-75 ±75	6
04	0.8	8	400 ±100	6
05	0.8	8	-75 ±75	6
06	0.8	8	400 ±100	6
07	0.8	8	-75 ±75	6
08	0.8	8	400 ±100	6
09	0.8	8	-75 ±75	6
10	0.8	8	400 ±100	6
11	0.8	8	-75 ±75	6
12	0.8	8	400 ±100	6

Type Variant	Minimum and Maximum Specified Capacitance (pF)		Temperature Coefficient (10^{-6}/°C)	Weight Max (g)
	Cm	CM		
13	0.9	8	-75 ±75	6
14	0.9	8	400 ±100	6

1.5 MAXIMUM RATINGS

The maximum ratings shall not be exceeded at any time during use or storage.

Maximum ratings shall only be exceeded during testing to the extent specified in this specification and when stipulated in Test Methods and Procedures of the ESCC Generic Specification.

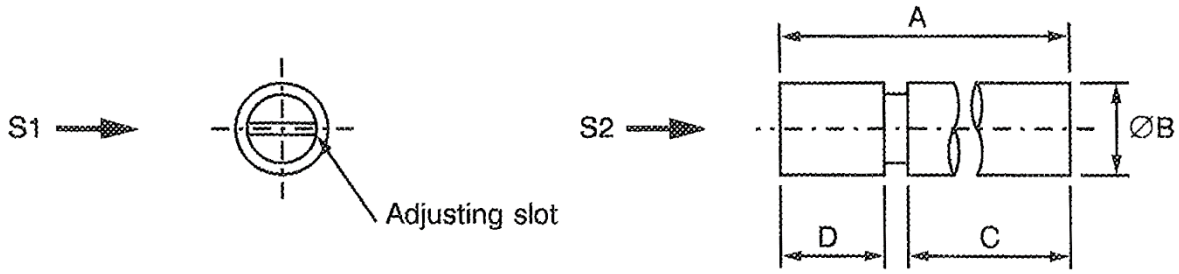

Characteristics	Symbols	Maximum Ratings	Units	Remarks
Rated Voltage	U_R	250	V	
Operating Temperature Range	T_{op}	-55 to +125	°C	T_{amb}
Storage Temperature Range	T_{stg}	-55 to +125	°C	
Soldering Temperature	T_{sol}	+185	°C	Note 1
Operating Torque	T_{qm}	1.5	N.cm	Note 2

NOTES:

1. Duration 5 seconds maximum.
2. Handling precautions are as follows:
   - An appropriate turning tool must be used.
   - The rotor shall not be disconnected from the stator.
   - Solvents must not be used for cleaning.

1.6 PHYSICAL DIMENSIONS

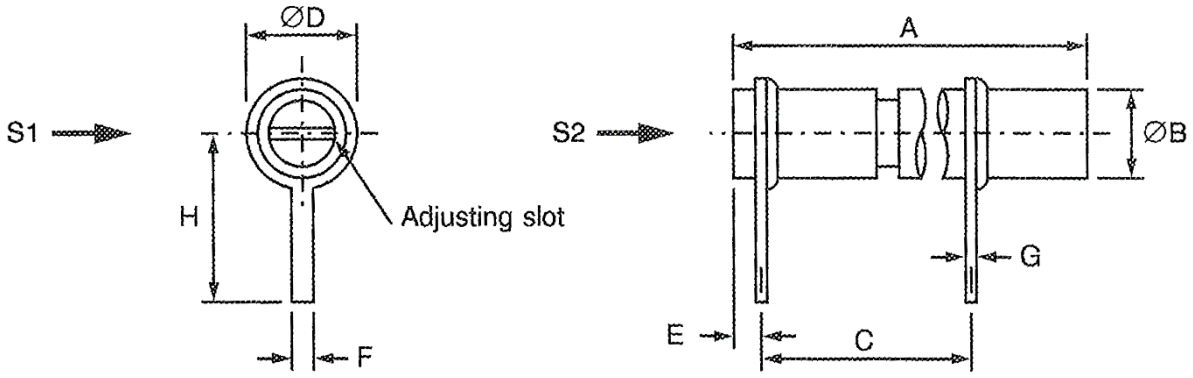

1.6.1 Component Type Variants 01 and 02

S1, S2 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	7.4	7.5
D	4.3	4.5

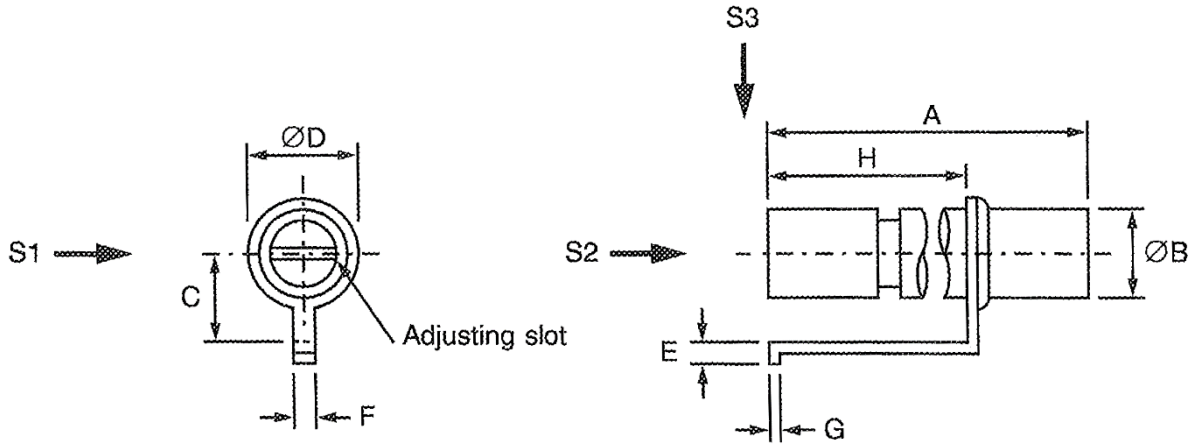

1.6.2 Component Type Variants 03 and 04

S1, S2 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	6.3	6.5

E	0.9	1.1
F	0.95	1.05
G	0.15	0.25
H	5.8	6

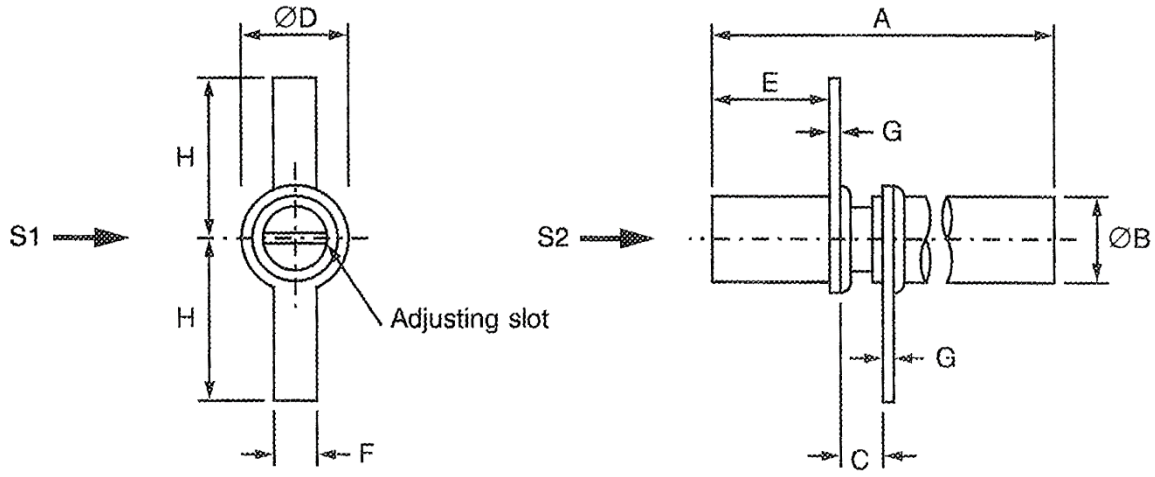

1.6.3 Component Type Variants 05 and 06

S1, S2, S3 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	2.7	2.9
ØD	-	3.6
E	0.5	0.7
F	0.95	1.05
G	0.15	0.25
H	6.3	6.5

1.6.4 Component Type Variants 07 and 08

S1, S2 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	1.5	1.7
ØD	-	3.6
E	3.5	3.7
F	2.35	2.45
G	0.15	0.25
H	5.8	6

1.6.5 Component Type Variants 09 and 10

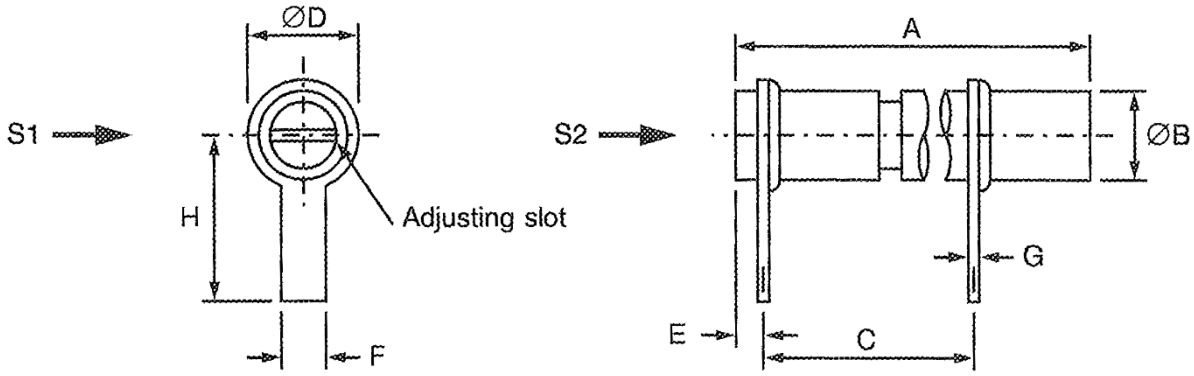

S1, S2 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	4.3	4.5

Symbols	Dimensions (mm)	
	Min	Max
ØD	-	4.7
E	6.3	6.5
G	0.15	0.25

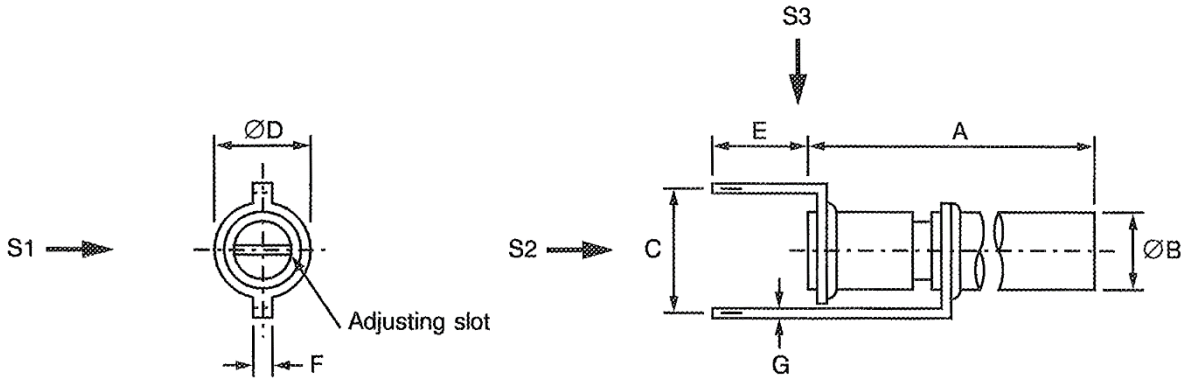

1.6.6 Component Type Variants 11 and 12

S1, S2 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	6.3	6.5
ØD	-	3.6
E	0.9	1.1
F	2.35	2.45
G	0.15	0.25
H	5.8	6

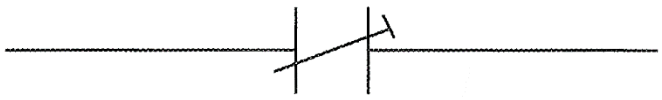

1.6.7 Component Type Variants 13 and 14

S1, S2, S3 – Vibration and Shock axes

Symbols	Dimensions (mm)	
	Min	Max
A	12	12.6
ØB	-	3
C	4	4.4
ØD	-	3.6
E	3	3.2
F	0.95	1.05
G	0.15	0.25

1.7 FUNCTIONAL DIAGRAM

1.8 MATERIALS AND FINISHES

1.8.1 Case

The body of the components shall be sapphire.

1.8.2 Terminals

Terminals shall be either gold plated or tinned.

2 REQUIREMENTS

2.1 GENERAL

The complete requirements for procurement of the components specified herein are as stated in this specification and the ESCC Generic Specification. Permitted deviations from the Generic Specification, applicable to this specification only, are listed below.

Permitted deviations from the Generic Specification and this Detail Specification, formally agreed with specific Manufacturers on the basis that the alternative requirements are equivalent to the ESCC requirement and do not affect the component's reliability, are listed in the appendices attached to this specification.

2.1.1 Deviations from the Generic Specification

2.1.1.1 Deviations from Qualification and Periodic Tests – Chart F4

(a) Mechanical Endurance: The 50 cycles shall be divided into 10 groups of 5 cycles. Upon completion of each group of 5 cycles, 1 minute of standing by shall be observed.

2.2 MARKING

The marking shall be in accordance with the requirements of ESCC Basic Specification No. 21700 and as follows.

The information to be marked on the component or its primary package shall be:

(a) The ESCC qualified components symbol (for ESCC qualified components only).
(b) The ESCC Component Number.
(c) Traceability information.

2.3 ROBUSTNESS OF TERMINATIONS

Component Type Variants 01, 02, 09 and 10 shall be subjected to Robustness of Terminations as specified in the ESCC Generic Specification.

Not applicable to Component Type Variants 03, 04, 05, 06, 07, 08, 11, 12, 13, 14.

2.4 RESISTANCE TO SOLDERING HEAT

The test conditions for Resistance to Soldering Heat are as follows:

- Immersion depth: To within 1mm from the body.
- Immersion time: 3.5 ±0.5 seconds.

2.5 ELECTRICAL AND MECHANICAL MEASUREMENTS AT ROOM, HIGH AND LOW TEMPERATURES

Electrical and mechanical measurements shall be performed at room, high and low temperatures.

2.5.1 Room Temperature Electrical and Mechanical Measurements

The measurements shall be performed at T_{amb} = +22 ±3°C.

Characteristics	Symbols	Test Method and Conditions	Limits		Units
			Min	Max	
Minimum Capacitance	Cm	ESCC No. 3010 Frequency: 1 ±0.1MHz	-	Note 1	pF
Maximum Capacitance	CM	ESCC No. 3010 Frequency: 1 ±0.1MHz	Note 1	-	pF
Change in Capacitance	-	ESCC No. 3010 Frequency: 1 ±0.1MHz	Note 2		-
Insulation Resistance	R_i	ESCC No. 3010 Test voltage = 500 ±25V	10^4	-	MΩ
Voltage Proof	VP	ESCC No. 3010	1000	-	V
Quality Factor	Q	ESCC No. 3010 Frequency: 100 ±5MHz Note 3	3000	-	-
Operating Torque	T_{qo}	ESCC No. 3010 C minimum to maximum	0.1	1	N.cm

NOTES:

1. See Para. 1.4.2.
2. The rate of change in capacitance as a function of the change in adjustment shall not change sign over the entire range of adjustment.
3. For Screening Tests, Quality Factor shall be performed on a randomly selected sample of 3 components with no failures allowed.

2.5.2 High and Low Temperatures Electrical Measurements

Characteristics	Symbols	Test Method and Conditions (Note 1)	Limits		Units
			Min	Max	
Insulation Resistance	R_i	ESCC No. 3010 Test voltage = 500 ±25V T_{amb} = +125 (+0 -3)°C	10^3	-	MΩ
Temperature Coefficient	TC	ESCC No. 3010 Note 2 Between -55°C and +22°C Between +22°C and +125°C	Note 3 Note 3		10^{-6}/°C

NOTES:

1. Measurements shall be performed on a sample of 5 components from each manufacturing lot with 0 failures allowed. In the event of any failure a 100% inspection may be performed.
2. Rotor set at approximately 75% of the maximum specified capacitance value and 2 components may be connected in parallel.
3. See Para. 1.4.2.

2.6 INTERMEDIATE AND END-POINT ELECTRICAL AND MECHANICAL MEASUREMENTS

Unless otherwise specified, the measurements shall be performed at T_{amb} = +22 ±3°C.

Unless otherwise specified the test methods and test conditions shall be as per the corresponding test defined in Para. 2.5.1, Room Temperature Electrical and Mechanical Measurements.

Applied Voltage	V_A	750	V

2.8 OPERATING LIFE CONDITIONS

The conditions shall be as specified in Para. 2.7.

APPENDIX 'A'

AGREED DEVIATIONS FOR EXXELIA TEMEX (F)

Item Affected	Description of Deviations
Para. 2.1.1, Deviations from the Generic Specification	The following *Deviations from Screening Tests – Chart F3* shall apply: • Quality Factor per Electrical and Mechanical Measurements in ESCC Generic Specification No. 3010 and Para. 2.5.1 herein: Quality Factor measurements shall be performed at frequencies comprised between 100 and 400 MHz. The value of the Quality Factor shall be determined at 100MHz by using the following formula: $Qfo = Qm \times (fm/fo)^{3/2}$ Where Qm is the Quality Factor read at frequency fm (fm is that frequency where the quarter-wave line, including the capacitance being measured, is resonating) and fo = 100MHz. The record sheet shall indicate the Quality Factor at 100MHz, as specified in Para. 2.5.1, as well as the frequency fm at which the Quality Factor was read.
Para. 2.1.1.1, Deviations from Qualification and Periodic Tests – Chart F4	• Quality Factor per Electrical and Mechanical Measurements in ESCC Generic Specification No. 3010 and Para. 2.5.1 herein: Quality Factor measurements shall be performed at frequencies comprised between 100 and 400 MHz. The value of the Quality Factor shall be determined at 100MHz by using the following formula: $Qfo = Qm \times (fm/fo)^{3/2}$ Where Qm is the Quality Factor read at frequency fm (fm is that frequency where the quarter-wave line, including the capacitance being measured, is resonating) and fo = 100MHz. The record sheet shall indicate the Quality Factor at 100MHz, as specified in Para. 2.5.1, as well as the frequency fm at which the Quality Factor was read. • Electrical Subgroup (Subgroup 3), Electrical and Mechanical Measurements: Quality Factor measurements shall be performed prior to Solderability.
