Continuation of Boxes above:

PID's Changes :

- Add of the new final finish supplier and details about SnPb alloy rate and thickness. Applicable from date code 2020.
- Change in coil manufacturing flow chart (Implementation of Cu doped brazing material in the same way as for TL26 relays per NCCS 2CSTPI501 revA closed in May 2019)
- Update of coil manufacturing lot travelers (addition of Cu doped brazing solution reference)
- Update of plans and documents
- Update of the in-process control flow (add. of recorded RVT test; NOT APPLICABLE to EL215 relays)

NB: Implementation of SnCuAg brazing material for coils has been validated on TL26 relays which have been agreed to represent a worst case in terms of risk since the wire diameter is the smallest in STPI space production.
